LotusOne

One platform.
## Unlimited possibilities.

The evolution of the VMS has arrived

LotusOne is the clear choice for whole-house healthcare workforce management.

The platform offers direct access to qualified clinicians and providers and equips healthcare organizations with intelligent applications to manage all aspects of workforce management. LotusOne delivers expanded functionality that overcomes the limitations of traditional VMS technology, removing complexity, saving time and lowering costs.

From sourcing and deployment to workforce optimization, LotusOne helps healthcare organizations solve tomorrow's needs, today. Built on analytics and AI, LotusOne intelligently weaves together market trends, historical data and more to empower healthcare organizations to make informed decisions. It delivers the highest value in the industry, at the lowest cost.

Learn how LotusOne can help you manage your workforce at **lotusone.com.**

Savings in utilization and pricing with deep market trend insights

Job market insights: Compete nationally with key insights on average time-to-fill, candidate pool size and market bill rate comparisons.

Reporting and analytics: Control utilization and spend with interactive dashboards, providing visibility into headcount, job demand trends, rates and more.

Engagement metrics: See how your jobs are performing and make key adjustments and fill roles quickly.

Custom reporting: Get detailed, custom reports to improve your program's performance and stay within budget.

Fulfill your strategic workforce goals.

Diversity badge: Easily prioritize candidates from certified diverse agencies with LotusOne.

Custom development and integrations: Automate processes with custom solutions and integrations at no additional cost.

Increase staffing precision with AI-powered tools.

Have the right staff at the right time with AI powered predictive analytics. LotusOne forecasts patient demand, and creates smarter staffing strategies in real-time, or even months in advance.

Float pool management plus talent on-demand

Fill open shifts with internal resources or extend to local talent and agency staff. Control who receives shift notifications through our easy-to-use app.

All the features and functionality you need in one place

Timecards: Integrate easy-to-manage timesheets with your existing systems to make approvals simple.

Consolidated billing: Easily approve and dispute invoices to gain full visibility into spend.

Credentialing and compliance management: Streamline document review processes with machine learning and easily maintain workers' compliance with proactive expiration alerts.

Our security system is based on the NIST cybersecurity framework, the highest standard for cybersecurity. Through a combination of automated scans, security benchmark scoring, third-party audits, and penetration tests, all data is carefully protected.
